

REPUBLIC ATTACK SHUTTLE

Dieser taktische Truppentransporter wurde von Cygnus Spaceworks für die Republikanische Klonarmee hergestellt. Er eignet sich für Angriffe, verfügt aber nur über zwei, wenn auch sehr effektive Doppelgeschütze. Besonders sein Hyperraumantrieb der Klasse 1 fällt auf, was auf einen sehr leistungsstarken Triebwerkstypen hinweist. Das gleiche Antriebssystem besitzt auch der V-19 Torrent, über den aber fast kein Schiffstyp der generischen Separatisten verfügt. Der starke Antrieb unterstreicht die Bedeutung des Schiffes für den schnellen Transport von Personal und Material. Das Shuttle, das oft eingesetzt wird, um Ahoka Tano und Anakin Skywalker zu transportieren, wird von zwei Klonpiloten gesteuert.

REPUBLIC ATTACK SHUTTLE

This tactical troop transport was made by the Cygnus Spaceworks for the Republican Clone Army. It is suitable for attack, but has only two double-barrelled guns, that are nevertheless very effective. It is particularly remarkable for its Class 1 hyper-space drive, indicating a very powerful type of engine. The V-19 Torrent also has the same drive system, which is available to hardly any enemy Separatist type of ship. The power of the engine underlines the importance of the ship for the rapid transport of personnel and equipment. This shuttle, often used to transport Ahsoka Tano and Anakin Skywalker, is driven by two clone pilots.
