

GTK BOXER (GTF2)

The GTfz has a core crew of three men, to which can be added an eight-man infantry unit, together with their standard armaments such as machine gun, 36 gun, anti-tank rocket launcher etc. The GTfz itself is armed with a guided weapons station 200 (FLW 200), which can be equipped optionally with a 12.7 mm MG or a 40 mm grenade launcher, and is operated internally with armoured protection. The multiple launcher is located on the weapons station. Thanks to the reversing camera, the driver can take fast evasive action behind a wall of smoke he generates for the purpose. For the infantry, who in principle dismount to fire, for the first time the BOXER represents a fully armoured personnel carrier. For many years the riflemen sat on the platform of the LKW 2 t gl Unimog. Now they dismount via the rear ramp and no longer jump over the side wall. The GTK BOXER is therefore an improvement in all respects.
