

BOEING 747-200

The enormous Boeing 747 long-haul aircraft completed its maiden flight on 09.02.1969. The jumbo jet had Pratt & Whitney engines with 19,731 kg thrust, a take-off weight of over 300,000 kg and could carry 385 passengers over a distance of 9,136 km. The 747 was designed by Boeing as a series. The 747-100 was followed by several variants with higher capacities.
